

Tobi DEGNON

me@oluwatobi.dev | github.com/tobi-de

SUMMARY

Backend engineer (Python/Django) with 6+ years of professional experience building products end to end, from architecture to deployment, with a strong focus on databases and performance

EXPERIENCE

Fasfox

Mar 2025 – present

Backend Engineer

- Building the backend of SuiteDispatch, a construction-management SaaS serving thousands of users for clients such as Bouygues and Eiffage
- Reduced response latency on key backend endpoints from 1–2 seconds to ~3 ms through database optimization
- Drove recurring N+1 query errors from 3–4 Sentry alerts per day to zero
- Built an internal CLI API client that speeds up other developers and enables AI-assisted automation
- Share AI tooling and automation practices across the engineering team

BFTGROUP

Nov 2021 – Feb 2025

Full Stack Web Developer

- Optimized a high-traffic Django platform serving millions of users in West Africa on a team of 3–5, cutting dashboard load time from 2 minutes to under 1 second (>99%) on a ~10-million-row database
- Designed and implemented a data migration tool to move client data off their legacy systems, preserving data integrity and business continuity
- Architected, developed, tested and documented a full-stack Django application for digital contract tracking for a major client
- Built a Python service that provisions staging environments for developers on demand
- Drove regular code reviews and built developer-experience tooling that grew into several open-source projects
- Received an excellence distinction from management when leaving the company

EDEV

Feb 2020 – Oct 2021

Full Stack Web Developer (Remote)

- Sole developer in an entrepreneur partnership: built around 8 applications end to end, from backend to frontend to deployment
- Owned the company's entire infrastructure, migrating from Heroku to a self-managed VPS to reduce costs
- Worked directly with customers to improve solutions and resolve production issues
- Onboarded and mentored trainees

PROJECTS

digitpharma – digitpharma.bj

July 2026 – present

- Platform for digital prescriptions and medicine delivery in Benin; main developer, including infrastructure and ops

billow – billow.bj

Feb 2026 – present

- Multi-tenant personal finance manager (schema-based PostgreSQL) with a plugin system and mobile money (MTN MoMo) integration

falco – falco.oluwatobi.dev

Dec 2023 – present

- Open-source Django toolbox (project template, CRUD generation, CI/CD scaffolding), 390+ GitHub stars

fujin – fujin.oluwatobi.dev

Oct 2024 – present

- Open-source CLI that deploys Django projects to production on a VPS in minutes

dj-shop-cart – tobi-de.github.io/dj-shop-cart

Feb 2022 – present

- Flexible open-source shopping cart package for Django, used in production by my team

homelab

Sept 2024 – present

- Five-machine homelab behind Tailscale running containerized services and a custom AI agent harness for secure self-hosting

SKILLS

Backend: Python, Django, Django REST Framework, FastAPI, PostgreSQL, SQL

Frontend: HTML/CSS, JavaScript, HTMX, AlpineJS, TailwindCSS

DevOps: Linux, Docker, Nginx, Caddy, GitHub Actions, AWS

AI: LLM agents, AI-assisted development and automation workflows

EDUCATION

Institut de Formation et de Recherche en Informatique (IFRI) – Computer Science — undergraduate coursework, 3 years completed

Nov 2016 – Jan 2020

- Degree not completed; resuming the final year via distance learning

LANGUAGES

English: Professional working

French: Native speaker
